# Year 5

**On Wednesday,** Year 5 visited Into University to take part in a series of astronomy related activities. The children were split into teams and quizzed about the solar system, winning points for their knowledge, attitude and team work. After lunch, Year 5 had the opportunity to learn more about different planets. Their mission was to design a prototype house that would be suitable for humans to live in on one of the planets. The children had to consider its atmosphere carefully in order to come up with the best design. Don't you think they look rather amazing?
